EDUCATION

Title of the Degree with Branch	College/University	Year of Passing
MASTER DEGREE	Jadavpur University	2010
BACHELOR DEGREE	West Bengal University of Technology	2008
XII	West Bengal Council of Higher Secondary Education	2004
X	West Bengal Board of Secondary Education	2002

OTHER SOFTWARE COURSES/CERTIFICATION COMPLETED THROUGH COGNIZANT ACADEMY:

No	Name of Institution (e.g. NIIT, APTECH, SSI Etc)	Diploma Certificate or	Year of Completion
1	Cognizant Academy	QEA Tech Trends for DE 101	04/03/2017
2	Cognizant Academy	CCP - L0 - Performance Testing	23/02/2017
3	NIIT	ISTQB Foundation Level External Certification	02/12/2013

TECHNICAL SKILLS

Operating System	Windows 98/XP/2003/Windows 7
Technology/ Platforms worked on	.Net / Salesforce
Programming Languages	C, C#
Databases & Tools	SQL Server, TOAD
Performance Testing Tools	LoadRunner 9.52, LoadRunner 11.52, LoadRunner 12.53, Jmeter 2.13, VSTS 2010
Monitoring Tools	CA Wily Introscope, Perfmon
Other Utilities	Putty, WinSCP, AppWorkz
Location	Kolkata, India

SUMMARY:

Tusar has 7 years 1 month of diverse experience in Performance Testing using industry-leading tools like HP LoadRunner, Jmeter and VSTS. He is adept in Performance testing of end-to-end applications, analyzing performance test results and providing a comprehensive test report with detailed observation & findings.

His responsibilities include NFR analysis, creation of performance test plan/strategy, development of performance scripts, execution of various performance tests and results analysis. He is proficient in executing various tests like load test, stress test, spike test, endurance tests.

Tusar has extensive experience in server-side Performance monitoring and Analysis as well with hands on working experience in CA APM Wily Introscope & Perfmon. He Has Hands on experience in different Protocols in HP Loadrunner, including Web (HTML/HTTP), Web Services (SOAP & REST), Ajax Truclient. Tusar has also worked on Agile /Shift Left model of Performance testing/ Early Performance testing model in multiple projects.

EMPLOYMENT HISTORY:

PROJECT PROFILE:**PROJECT # 1**

Project Title	QMO EM Testing Services
Duration	Oct 2017- Present
Location	Kolkata, India
Tools/Utilities	Load Runner 12.53

PROJECT DESCRIPTION:

The Win Infor application developed for Ground Ops for South West Employees manages the different Ground level operations for the airline employees for different roles namely IAM, TWU with different functions and another Supervisor role for managing the Vacation, Shift and other operational categories of the employees. The Performance testing engagement focus on the Bidding Mechanism of the various sections like Schedule Bidding for Working Shifts, Vacation Bidding for Employee vacation, OTM i.e. Over Time Management for any additional work hour managements etc.

CLIENT DESCRIPTION:

Southwest Airlines Co. is a major U.S. airline headquartered in Dallas, Texas, and the world's largest low-cost carrier.

The airline was established in 1967 by Herb Kelleher as Air Southwest and then adopted its current name, Southwest Airlines, in 1971 when it began operating as an intrastate airline wholly within the state of Texas. The airline has more than 55,000 employees as of July 2017 and operates more than 4,000 departures a day during peak travel season. As of 2014, it carried the most domestic passengers of any U.S. airline. As of February 2018, Southwest Airlines has scheduled services to 100 destinations in the United States and ten additional countries, with services to Turks & Caicos having begun on November 5, 2017. Service to Hawaii is coming in 2018 subject to FAA approval, with destination cities to be decided on and announced in the near future.

ROLES AND RESPONSIBILITIES:

Roles and Responsibilities include validation of performance of the Win Infor application's in-scope business flows using the Load Runner 12.53. The Script development involved scripting using both Java custom coding and basic HTTP/HTML protocol. Data setup activities were also performed for creation of Bid Groups to be used in different business flows like Schedule Bidding or Vacation Bidding. Performance metrics were collected during the test using the HP Diagnostics plugin setup with the Controller. Collated the results from the Controller and prepared the Test Summary Report and shared it with the Onshore counterpart for review.

DURATION OF THE PROJECT:

Duration	5 Months(Oct 2017- Present)
-----------------	-----------------------------

PROJECT # 2

Project Title	Gymboree Omni Channel QA
Duration	April 2017- Sept 2017
Location	Kolkata, India
Tools/Utilities	Putty,WinSCP3,AppWorkx

PROJECT DESCRIPTION:

The main purpose of this project is to do the Performance assessment (Volumetric) of the Gymboree Omni Channel Legacy Interfaces by Batch Job Interface testing/Volume testing (It refers to testing an application or interface or the product with larger amount of data).

CLIENT DESCRIPTION:

The Gymboree Corporation is an American, San Francisco-based corporation that operates a chain of over 1200 specialty retail stores of children's apparel in the United States, Puerto Rico and Canada.

ROLES AND RESPONSIBILITIES:

Validated the performance of the Interfaces as per nonfunctional requirements which included Volume and Scalability and/or Break Point testing of the legacy interfaces and to establish a baseline from the execution results. Monitored the Server (App/DB) Resource Utilization during the Batch Job Interface Execution was performed through Unix Commands. Prepare Performance Assessment Report of individual interfaces along with Statspack Report of oracle DB which include detail analysis of DB server. Prepared a Final Executive Performance Assessment Report of all the interfaces which were involved in the Gymboree Omni Channel QA Program

DURATION OF THE PROJECT:

Duration	6 Months (April 2017- Sept 2017)
-----------------	----------------------------------

PROJECT # 3

Project Title	WEX Project Iron
Duration	Jan 2017- March 2017
Location	Kolkata, India
Tools/Utilities	HP Load Runner 12.53, HP Performance Center

PROJECT DESCRIPTION:

The objective is to performance test the business critical UIs and APIs, creating scripts, executing tests, monitoring, preparation and analysis of results. Initially tests are executed in a lower environment with reduced number of users to identify performance issues. Further tests are to be carried out in dedicated performance environment having production like specification.

CLIENT DESCRIPTION:

WEX Inc. is a provider of payment processing and information management services to the United States commercial and government vehicle fleet industry. WEX is a B2B virtual payments provider that provides virtual credit card that is powered by MasterCard. WEX is planning to use

their own software to retire from there product based software which is being used for their day to day business activity.

ROLES AND RESPONSIBILITIES:

Roles and Responsibilities include Performance Testing and Engineering of UI and API applications. Collecting and analyzing non-functional requirements and identifying the scope of Performance testing, preparation of Performance test strategy, test plan and effort estimate. Also it involved Creation of custom Load Runner scripts following script development standards for the identified business critical flows, execution of smoke and load tests and monitoring backend servers for the test duration. Finally, it involved preparation of test results containing client side and server side metrics along with necessary observations obtained from AppDynamics.

DURATION OF THE PROJECT:

Duration	3 Months (Jan 2017- March 2017)
----------	---------------------------------

PROJECT # 4

Project Title	MLC QA Shared Services
Duration	July 2015 – Jan 2017
Location	Kolkata, India
Tools/Utilities	Load Runner 11.52, Performance Center 11.52

PROJECT DESCRIPTION

The MLC QA Shared Services have multiple applications divided across different Line of businesses e.g. Institutional, Bank, Retail, Shared Services etc. as the in scope application for Performance testing. The engagement runs with short/long term project requirements under these various LOBs.

CLIENT DESCRIPTION

Manulife Financial is a leading Canada-based financial services group with principal operations in Asia, Canada and the United States. In 2012, we celebrate 125 years of providing clients strong, reliable, trustworthy and forward-thinking solutions for their most significant financial decisions. Our international network of employees, agents and distribution partners offers financial protection and wealth management products and services. These products and services include individual life insurance, group life and health insurance, long-term care services, pension products, annuities, mutual funds and banking products. We provide asset management services to institutional customers worldwide and offer reinsurance solutions, specializing in property and casualty retrocession. The Company operates in Canada and Asia through the brand name "Manulife Financial" and in the United States primarily through the brand name "John Hancock".

ROLES AND RESPONSIBILITIES

Roles and Responsibilities involve Requirement Elicitation, Providing Inputs on the estimation of the tasks for Test plan and also follow-up with team in gathering requirements for new applications getting introduced in the release, System Study and analysis of application navigation, Test script generation for business functions, Design Load scenarios using Performance Center, Test scenario executions for various loads using Performance Center. Weekly status report preparation in a proposed template, Load test execution summary report

preparation in a proposed template, Final summary report preparation in a proposed template.

DURATION OF THE PROJECT:

Duration	19 Months (July 2015 – Jan 2017)
----------	----------------------------------

PROJECT # 5

Project Title	CA - AMbR Development
Duration	May 2015 – July 2015
Location	Kolkata, India
Tools/Utilities	Jmeter 2.13

PROJECT DESCRIPTION

The CA - AMbR Development had the Teachers Support Site (TSS) as the in scope application for Performance testing. The application was developed in Zope framework. The requirement was to remediate the application's malfunction under load.

CLIENT DESCRIPTION

Established over 150 years ago, Cambridge Assessment operates and manages the University's three exam boards and carries out leading-edge academic and operational research on assessment in education. They develop and deliver examinations and tests around the world through our three exam boards. They also provide research and consultancy services in a range of associated disciplines and they have a comprehensive calendar of events and seminars which you are welcome to attend.

ROLES AND RESPONSIBILITIES

Roles and Responsibilities involve Requirement Elicitation, Providing Inputs on the estimation of the tasks for Test plan and also follow-up with team in gathering requirements for new applications getting introduced in the release, System Study and analysis of application navigation, Test script generation for business functions, Design Load scenarios using JMeter, Test scenario executions for various loads using JMeter. Weekly status report preparation in a proposed template, Load test execution summary report preparation in a proposed template, Final summary report preparation in a proposed template.

DURATION OF THE PROJECT:

Duration	3 Months (May 2015 – July 2015)
----------	---------------------------------

PROJECT # 6

Project Title	JH Customer One PHS Track
Duration	Dec 2014 – Apr 2015
Location	Kolkata, India
Tools/Utilities	HP Load Runner 11.52/Performance Center 11.52/HP Quality Center

PROJECT DESCRIPTION

The Customer One PHS Track had multiple applications in scope of performance testing like Salesforce, EFS, AWD and various TIBCO and MQ web services. Salesforce.com is a global cloud computing company headquartered in San Francisco, California. It is best known for its customer relationship management (CRM) product. Salesforce.com is the primary enterprise offering within the Salesforce1 Platform, and provides companies with an interface for case management and task management, and a system for automatically routing and escalating important events. The Salesforce customer portal provides customers the ability to track their own cases. Electronic File System (EFS) is an application hosted by DST systems where filings made with EFS-Web provides with the same legal protection as paper-based filings. An electronic receipt and confirmation is received, as well as the ability to print the receipt for the records, affirming the receipt date. Even the largest and most complex patent applications can be submitted by attaching PDF files and filling out a few simple web screens. AWD is a scalable, functionally rich business process management (BPM) solution that uses a Java enterprise edition (JEE)-based architecture to deliver performance scalability and security - all on commodity hardware. The separation-through-application server and database server allows to make choices in terms of horizontal and vertical scaling. As an open architecture solution, AWD uses web services from existing line of business system(s), administration systems or external third parties, while exposing many of the services through both SOAP and RESTful APIs. Various TIBCO services were also tested which were of Representational State Transfer (REST) type. REST is a coordinated set of constraints applied to the design of components in a distributed hypermedia system that can lead to a more performance and maintainable architecture. REST has gained widespread acceptance across the Web as a simpler alternative to SOAP and WSDL-based Web services. RESTful systems typically, but not always, communicate over the Hypertext Transfer Protocol with the same HTTP verbs (GET, POST etc.) used by web browsers to retrieve web pages and send data to remote servers.

CLIENT DESCRIPTION

The client was John Hancock Life Insurance Company Limited, based out of United states of America.

ROLES AND RESPONSIBILITIES

Roles and Responsibilities involve Requirement Elicitation, Providing Inputs on the estimation of the tasks for Test plan and also follow-up with team in gathering requirements for new applications getting introduced in the release, System Study and analysis of application navigation, Test script generation for business functions, Design Load scenarios using Performance Center, Test scenario executions for various loads using Performance Center. Weekly status report preparation in a proposed template, Load test execution summary report preparation in a proposed template, Final summary report preparation in a proposed template.

PROJECT # 11

Project Title	waitrose - OFF Perf Testing
Duration	July 2013 – Sept 2013
Location	Kolkata, India
Tools/Utilities	HP Load Runner 11/Performance Center 11

PROJECT DESCRIPTION

Waitrose – OFF Perf Testing project was also based on the PTaaS (Performance Testing as a Service) model where the Order Fulfillment Reporting section was tested.

CLIENT DESCRIPTION

Waitrose is a chain of British supermarkets, forming the food retail division of Britain's largest employee-owned retailer, the John Lewis Partnership. Its head office is in Bracknell, Berkshire, England. As of October 2013, Waitrose has 300 branches across the United Kingdom, including 30 "little Waitrose" convenience stores, and a 4.9% share of the market, making it the sixth-largest grocery retailer in the UK.

ROLES AND RESPONSIBILITIES

Roles and Responsibilities involve Requirement Elicitation, Providing Inputs on the estimation of the tasks for Test plan and also follow-up with team in gathering requirements for new applications getting introduced in the release, System Study and analysis of application navigation, Test script generation for business functions, Design Load scenarios using Performance Center, Test scenario executions for various loads using Performance Center. Weekly status report preparation in a proposed template, Load test execution summary report preparation in a proposed template, Final summary report preparation in a proposed template.

DURATION OF THE PROJECT:

Duration	3 Months (July 2013 – Sept 2013)
----------	----------------------------------

PROJECT # 12

Project Title	WF_PTAAS
Duration	June 2013 – July 2013
Location	Kolkata, India
Tools	Performance Center 11

PROJECT DESCRIPTION

WF_PTAAS project was based on the PTaaS (Performance Testing as a Service) model where different Wells Fargo web services were tested.

CLIENT DESCRIPTION

Wells Fargo & Company is an American multinational banking and financial services holding company with operations around the world. Wells Fargo is the fourth largest bank in the U.S. by assets and the largest bank by market capitalization. Wells Fargo is the second largest bank in deposits, home mortgage servicing, and debit cards. In 2011, Wells Fargo was the 23rd largest company in the United States. Wells Fargo is headquartered in San Francisco, California, with "hubquarters" throughout the country.

ROLES AND RESPONSIBILITIES

Roles and Responsibilities involve Requirement Elicitation, Providing Inputs on the estimation of the tasks for Test plan and also follow-up with team in gathering requirements for new applications getting introduced in the release, System Study and analysis of application navigation, Test script generation for business functions, Design Load scenarios using Performance Center, Test scenario executions for various loads using Performance Center.

Weekly status report preparation in a proposed template, Load test execution summary report preparation in a proposed template, Final summary report preparation in a proposed template.

DURATION OF THE PROJECT:

Duration	2 Months (June 2013 – July 2013)
----------	----------------------------------

PROJECT # 13

Project Title	WHG-MTC
Duration	Jan 2013 – May 2013
Location	Kolkata, India
Tools	HP Load Runner 11.5, DynaTrace Ajax edition, Soap UI

PROJECT DESCRIPTION

In WHG-MTC project many applications are being used as in scope for Performance Testing and each and every application has its own set of functional and nonfunctional requirements.

CLIENT DESCRIPTION

Wyndham Hotel Group is the world's largest and most diverse hotel company with approximately 7,380 hotels worldwide. With iconic brands and hotel choices in every category from upscale to economy, we offer not only the most lodging choices around the world but also exceptional customer service and great value.
